Afseen Construction, established on July 6, 2017, is a dedicated sister concern of the Real Capita Group. Since its inception, the company has been actively involved in civil construction projects across Bangladesh, delivering a wide range of services that include architectural design, cost estimation, structural construction, finishing works, legal documentation, and full project management. With a skilled team of architects, engineers, and supervisors, Afseen Construction has successfully executed numerous high-rise apartments, commercial spaces, hospitals, and community-based residential zones.

The company is widely recognized for its commitment to quality, timely delivery, and professional excellence. From the very beginning, Afseen Construction has focused on maintaining a high standard of work, relying on a combination of experience, technical expertise, and a strong project management approach. Their primary role involves managing and executing construction projects from start to finish, ensuring they are completed efficiently and within the designated timeframe.

Afseen Construction works closely with architects and engineers to develop detailed construction plans, including feasibility studies, site surveys, and comprehensive project schedules. Each project is tailored to best fit the specific requirements, with careful attention to assigning the right people in the right roles—believing that this strategic alignment is key to successful project outcomes. With a clear vision and a skilled workforce, Afseen Construction continues to build a reputation as a trusted name in Bangladesh's construction industry, contributing to the nation's growing urban and community infrastructure.
